

MD. ASADUJJAMAN

Backend Software Engineer

Dhaka, Bangladesh | +880 1521-423567 | asadujjaman255@gmail.com
asadujjaman47.github.io | github.com/Asadujjaman47 | linkedin.com/in/asadujjaman10212

PROFESSIONAL SUMMARY

Backend Software Engineer with over 2 years of experience building scalable, reliable systems with Java and Spring Boot. Skilled in designing RESTful APIs, microservices, and modular monoliths with a focus on clean architecture and observability. Passionate about cloud-native technologies and solving complex problems with simple, dependable solutions.

PROFESSIONAL EXPERIENCE

PIS

Junior Backend Developer | Feb 2024 – Present

- Develop and maintain backend services using Java, Spring Boot, PostgreSQL, Redis, and RabbitMQ.
- Build and maintain RESTful APIs following clean architecture principles.
- Contributed to migrating from a monolith to microservices with Eureka service discovery and cloud config.
- Collaborate with senior engineers in Agile sprints, code reviews, and production support.

Backend Development Intern | Oct 2023 – Jan 2024

- Developed a secure leave-management system using Spring Boot, Spring Security, and the MVC pattern.
- Implemented role-based authentication and authorization to safeguard application endpoints.

Intern (Trainee)

ERA Info Tech | Apr 2023 – Sep 2023

- Built RESTful APIs with Spring Boot and Oracle Database following a layered architecture.
- Applied dependency injection and JPA-based persistence to deliver maintainable backend services.
- Contributed to enterprise backend best practices through mentorship and code reviews.

PROJECTS

Modulith E-Commerce Platform

Spring Boot, Spring Modulith, PostgreSQL, Redis, Spring Security, Docker | [GitHub](#)

- Designed a production-ready Modular Monolith architecture using Spring Modulith.
- Implemented JWT authentication with refresh token rotation and role-based authorization.
- Developed inventory reservation and stock management modules.
- Integrated Micrometer, Prometheus, Grafana, and Zipkin for complete observability.
- Automated CI workflows using GitHub Actions and Docker.

Spring Microservices Lab

Spring Boot, Spring Cloud, PostgreSQL, Redis, RabbitMQ | [GitHub](#)

- Built an e-commerce backend using Spring Cloud microservices.
- Implemented centralized configuration, service discovery, and API Gateway.
- Developed synchronous REST communication and asynchronous messaging with RabbitMQ.
- Added Redis caching and distributed tracing using Zipkin and Micrometer.

TECHNICAL SKILLS

Languages

Java, SQL, JavaScript, Python

Backend

Spring Boot, Spring Security, Spring Cloud, Spring Modulith, REST APIs

Architecture

Modular Monolith, Microservices

Databases

PostgreSQL, MySQL, MongoDB, Redis

Messaging

RabbitMQ, Kafka

DevOps & Cloud

Docker, GitHub Actions, Linux, AWS (Basic)

Monitoring

Micrometer, Prometheus, Grafana, Zipkin

Tools

Git, IntelliJ IDEA, VS Code

EDUCATION

B.Sc. in Computer Science & Engineering

Daffodil International University
2017 – 2021

HSC, Science

Carmichael College, Rangpur
2014 – 2016

ACHIEVEMENTS

- Solved 200+ DSA and SQL problems on LeetCode and HackerRank.
- 6th place among 161 teams, AI for Bangla Competition (ICT Division, 2022).
- Executive Member, DIU Computer & Programming Club (2018–2021).
- Problem Solving Lab Prefect, DIU (2020) — delivered C/DSA tutorials and mentored students.
